EDUCATION

SRM Institute of Science & Technology

Chennai, India

B. Tech. in Computer Science & Engineering; GPA: 8.98/10.00

July 2018 – Jun 2022

SKILLS

Languages: JavaScript, TypeScript, Python, Java

Technologies: React.js, ReactNative, NextJs, Redux, React-Query, Shad-cdn, Tailwind, Flask, Node.Js, Express

EXPERIENCE

Bajaj Finserv Health

Pune, India

Software Development Engineer

October 2023 – Present, Full-time

- * Improved the loading speed of **20 screens** to under **0.3 seconds** and enhanced the performance of 8 web-pages elevating Lighthouse scores to greater than **90** resulting in **reduced load time by 40%**.
- * Enhanced monitoring functionality by introducing real-time alerting for critical APIs and page crashes within Grafana, leading to a **31% improvement** in journey uptimes.
- * Guided and provided mentorship to **4 interns** across various features, facilitating the development of optimized cross-platform user experiences.

Bajaj Finserv Health

Pune, India

Associate Software Development Engineer

July 2022 – September 2023, Full-time

- * Designed a highly versatile file-upload component with customizable constraints, image compression, and image cropping, which found application in four separate user journeys within a React Native application. This component effectively manages a monthly traffic volume of over **3,00,000 files**.
- * Implemented a budget-conscious localization solution to address a critical client requirement, enabling support for over **10 locales** across the website.
- * Enhanced code coverage in a React Native project from **0% to 34%** and elevated coverage from **42% to 60%** in a Next.js project through the creation of Jest unit test cases.

Bajaj Finserv Health

Pune, India

Software Development Engineer Intern

January 2022 – June 2022, Internship

- * Employed React Native and TypeScript to construct screens with impeccable designs, ensuring responsiveness, high performance, and accessibility. These screens effectively supported a daily influx upwards of **500 claims**.
- * Orchestrated a swift migration of a JavaScript project to TypeScript, boosting code reliability. Implemented static typing, reducing runtime errors by **20%**. improving collaboration and developer **efficiency by 15%**.

AWARDS & ACHIEVEMENTS

Key Contributor Award

- * Recipient for impactful innovations and collaborative excellence, driving success and positive team and organizational impacts.

40 Stars on Github

- * Open-sourced and developed [Unofficial Geeks For Geeks API](#) a Flask-based project using web scraping, with 40 stars on GitHub. Successfully integrated with an Android application on the Play Store.

Runner's Up @ HackCBS 3.0 |

- * With over two thousand participants and more than two hundred teams for [Aapka Apna Hiphop](#) an AI-based rap verse generator platform.

PROJECTS

Rancho | [GitHub](#)

- * Developed an advanced SaaS solution to enhance last-minute note revision. The software ingests PDFs, utilizes Open AI for comprehensive analysis, and offers precise, chat-like responses to enhance the revision process.

Memeories | [GitHub](#)

- * Contemporary full-stack application designed to empower users to upload cherished memes. They have the option to contribute their treasured memories, which can then be shared within our expansive user community
